# NITE NITE SPIDER MITE

---

## **“An all natural Pest Control that works”**

Stops spider mites in their tracks by a simple sticking effect. This changes the condition of the leaf to make things uninhabitable for spider mite. Nite Nite Spider Mitre is produced using all natural ingredients and is

100% natural organic concentrate that is diluted to apply with a trigger spray such as the Guard'n'Aid Pest Pistol.

## **MIXING - Shake well before use**

Add to warm water at the rate of 25ml per 500ml Nite Nite Spider Mite concentrate into a suitable container or Pest-Off Pistol. Shake well till thoroughly mixed and apply. Thoroughly clean PestOFF Pistol after use.

## **APPLICATION**

Spray onto plants, ensuring all surfaces are wetted. It is essential to ensure good spray coverage of the sites where the spider mites are found, including the underside of the leaf. Apply at the end of the day and leave to work overnight or when the lights are off. Apply when you see there is a problem. Use mixed solution within 6 hours of mixing.

**CAUTION:** Not to use on cuttings or stressed/wilted plants. Can be applied up until harvest.
